POULTRY EQUIPMENT

# VANCOMATIC

Hatching eggs are moist as soon as they are laid. When spawned on a dirty surface, dirt is likely to adhere to the egg and bacteria to contaminate the egg.

## Clean Egg Starts with Clean nest boxes

The hatching egg is moist as soon as it is laid. When spawned on a dirty surface, dirt is likely to adhere to the egg and bacteria to contaminate the egg. The heart of Vencomatic nest boxes is the Vencomat nest mat that touches the egg at a minimum. Thanks to lifting the nest for the night, the chicken cannot sit inside the nest and the nest is also cleaned.

## Careful Collection and Transport

To achieve perfect storage conditions, the hatching egg center is rolled gently towards the egg belt. The egg remains here in a constant temperature and hygienic environment. The rectangular holes in the egg belt ensure minimum egg contact and a hygienic surface. These holes also create a slight flow of air around the egg to allow its temperature to drop. The chicken cannot see the egg and cannot sit on it. This eliminates the desire to incubate the chicken.

## Precision Processing and Packaging

With automatic egg collection systems owned by Vencomatic, hatching eggs are carried carefully. Our products; they are designed to perform precise processing to prevent cracking of the egg. Hatching eggs from more than one nest can be transported to the central collection area with an egg conveyor conveyor. Vencobelt has egg-friendly plastic carriers.

### GRANDO NEST

### VENCOBELT

# GRANDO NEST

It is an ideal nest for breeding. It provides clean and healthy eggs. It is robust and requires very little maintenance.

- Ideal nest for breeding
- Provides clean and healthy eggs
- Robust and requires little maintenance
- Slat bars are easy to install and place.
- One or two egg band equipment is possible in the nest. The holes are square for minimal contact.
- It has a solid and clean structure consisting of one piece for easy and quick assembly.
- Deep nesting eye for the maximum number of breeding eggs
- Vencomatic timer control box
- Egg belt turning point with an egg belt brush on the end

# VENCOBELT

Using the Vecobelt egg transport system, eggs from different nests or poultry can be transported to the central collection area.

Using the Vencobelt egg transport system, eggs from different nests or poultry can be transported to the central collection area. This 40 cm wide conveyor belt has a maximum capacity of 26,000 eggs / hour. (Depending on the egg feeding.) The single chain system facilitates the use of the tape. Sturdy and durable plastic egg carriers are very sensitive and do not damage the egg. The design of the carriers allows the belt to operate with a slope up to 28 degrees.

# ZIGGITY

## DRINKING SYSTEMS

Ziggity has been producing only nipple irrigation systems since the first day of its establishment. All R&D studies and production capabilities; It uses a more reliable, higher performance and longer life nipple irrigation system. While MAX3 nipples are used in broiler and breeder houses, within the "Ziggity Poultry Guide", it can also provide the hens with the amount of water they need. Smooth water pipe made of PVC raw material reduces the risk of biofilm formation, while the line can be cleaned very easily and effectively.

Ziggity nipple drinkers are offered to customers with a 10-year gradual warranty.

Specially designed Ziggity Max3 nipples are designed to provide as much water as the chickens need at every stage of the growing period. For perfect broiler performance and dry litter, you need the Ziggity Max3 drinkers. Water bowls that can provide chickens with the water they need thanks to its perfect design in every period of use; It helps to achieve significant improvement in key criteria such as weight, FCR, first week deaths. Like the other nipple drinkers on the market, it provides excess water and prevents the base deterioration and thus the problems that occur due to this. Since your litter remains dry, you do not need to spend too much on heating and ventilation unnecessarily. Result; higher income, lower cost and more profit.

Ziggity is just the beginning of swapping nipples. To maximize herd performance and litter quality, you can perfect the system using the Ziggity regulator and end-of-line units.

## **STUD POULTRY EQUIPMENTS**

VDL Agrotech Offers You High Quality and Efficiency with Stud Poultry Equipment.

VDL Agrotech in central Turkey who works with Avi Eindhoven in the Netherlands and is a member of the VDL Groep over 10,000 employees in 19 countries. VDL Agrotech has been manufacturing equipment for the livestock industry for 50 years. The product range includes feeding, irrigation systems, ventilation, cooling and drying systems. VDL Agrotech is a company specialized in turnkey engineering projects. It designs, draws and produces equipment in the most appropriate way, from the east to the west, suitable for environmental conditions, considering customer demand. Standing next to the customer after delivery, VDL ensures the correct assembly of the equipment that comes with its experienced supervisors. Excellent service, reliable delivery, high quality production and trained staff; VDL is the key to Agrotech's success.

# MUNTERS

## VENTILATION PRODUCTS

The excellent performances of Munters Ventilation products are world-renowned accredited laboratories; Certified by Bess Lab.

Producing efficient, high-quality production that minimizes negative environmental impact, Munters provides exhaust type and circulation fans, cooling pads and air dampers in the product range, where they can meet the needs of customers by providing excellent performance and certified products for chicken coops, greenhouses, cattle farms and industrial applications.

# ILU-MAX

## LED LIGHTING SYSTEM

High efficient Dimmable LED Lighting System for your chicken houses

- Flicker Free Dim feature.
- Fast and flexible assembly
- Wide-angle lighting area
- There is no need for protection glass.
  - IP67 Waterproof
- Low consumption Led Lamp 8W (900lm = 75 W Flemish Lamp)
- 230V-50 / 60Hz, connection to the flat cable with pin holder
  - Colour options; white, blue, green, red.
  - High efficiency: 112 lm / W
- Average lifetime > 25,000 hours - 3 years warranty.
- 0-100% dimming feature with EPU-1500.
- Max. 150 ILU-MAX / EPU-1500 Dimmers can be connected.
